Sustainability Policy

KHG-POL-HSE-1177

KHG contracting Pty Ltd is committed to operating in an environmentally friendly, socially responsible, and economically viable manner in the long term. The policy outlines the organisation's commitment to sustainability and provides a framework for decision-making and action.

Key components of a sustainability policy may include:

- **Environmental Stewardship**: The organisation commits to minimising its environmental impact by conserving resources, reducing waste and pollution, and promoting the use of renewable energy.

- **Social Responsibility**: The organisation acknowledges its responsibility to the communities in which it operates and commits to promoting social equity, diversity, and inclusion, and ensuring fair labour practices throughout its supply chain.

- **Economic Viability**: The organisation recognises that sustainability is not only about environmental and social responsibility but also about long-term economic viability. It commits to making sustainable business decisions that consider the economic impact on all stakeholders.

- **Compliance with Laws and Regulations**: The organisation commits to complying with all applicable laws, regulations, and industry standards related to sustainability and environmental protection.

- **Continuous Improvement**: The organisation commits to regularly reviewing and improving its sustainability performance by setting goals, monitoring progress, and implementing best practices.

- **Stakeholder Engagement**: The organisation commits to engaging with its stakeholders, including employees, customers, suppliers, and local communities, to understand their concerns, gather feedback, and involve them in decision-making processes related to sustainability.

- **Transparency and Reporting**: The organisation commits to being transparent about its sustainability performance by regularly reporting on its progress, achievements, and challenges.
